

Local Backup, Storage & Recovery with Offsite Server Restoration**Step-by-Step Process**

1. Customers Data and Server Snapshots are taken daily and stored on local "Data Protection Unit".
2. Data is transmitted to "Vault" offsite in secure Data Center via SSL Encryption.
3. In case of **Disaster Declaration**, 4Service will restore your Snapshots, Applications & Data to the Standby Servers and get your business back online within a 4-48 hr recovery time.
